PERSONAL STATEMENT

I am enthusiastic to demonstrate my expertise and apply my skills in complete alignment with the organization's mission. Committed to contributing significantly to the company's growth, I dedicate my full capabilities to ensure its success.

EDUCATION

October 2019 – August 2022

BSc Computer Science (Second Class Upper)

Joseph Ayo Babalola University, Osun State, Nigeria.

Work Experience

Unified Payments April 2024 - Till date

Frontend Developer

- **Collaborated with cross-functional teams** (Product, Design, and Backend) to drive the successful development, testing, and deployment of cutting-edge fintech products, ensuring alignment with business objectives and user needs.
- **Engineered the front-end architecture** of an inventory application for Hope Bank, a subsidiary of Unified Payments, enhancing operational efficiency and streamlining inventory management processes.
- **Led the front-end development** of a key fintech project, applying modern web technologies and best practices to deliver a responsive, user-friendly interface that improved customer satisfaction.

Rhema Chapel International College Oluyole, Ibadan November 2022 – October 2023

IT Support Associate

- **Provided comprehensive technical support** to both teachers and students, ensuring smooth and effective use of the computer lab facilities.
- **Monitored and optimized IT systems** to enhance efficiency, while maintaining the safety and security of all data within the network.
- **Facilitated practical learning** by assisting in the instruction of students during computer lab sessions, bridging the gap between theoretical knowledge and hands-on application.
- **Guided students in mastering computer applications**, offering training and support in Microsoft Office and other essential software tools.
- **Contributed to the full product lifecycle** by providing input on UI/UX design, conducting rigorous testing, and iterating based on feedback, ultimately leading to a seamless product launch.

Freelancer August 2022

Database Admin and Web developer

- **Designed, developed, and maintained websites** for various clients, creating user-friendly, responsive web solutions tailored to client needs using HTML, CSS, JavaScript, and other modern technologies.
- **Managed and optimized databases** to ensure data integrity, security, and high performance across multiple projects, utilizing SQL and database management best practices.
- **Collaborated with clients** to gather requirements, provide technical consultations, and deliver customized solutions that aligned with their business goals and enhanced their online presence.
- **Troubleshoot and resolved technical issues**, ensuring smooth functionality and optimal user experiences, while continuously improving performance through regular updates and maintenance.
